

Exercise -6

BDMA LAB6: Analysis the supermarket sales data using HQL

Annapoornima S
(225229101)

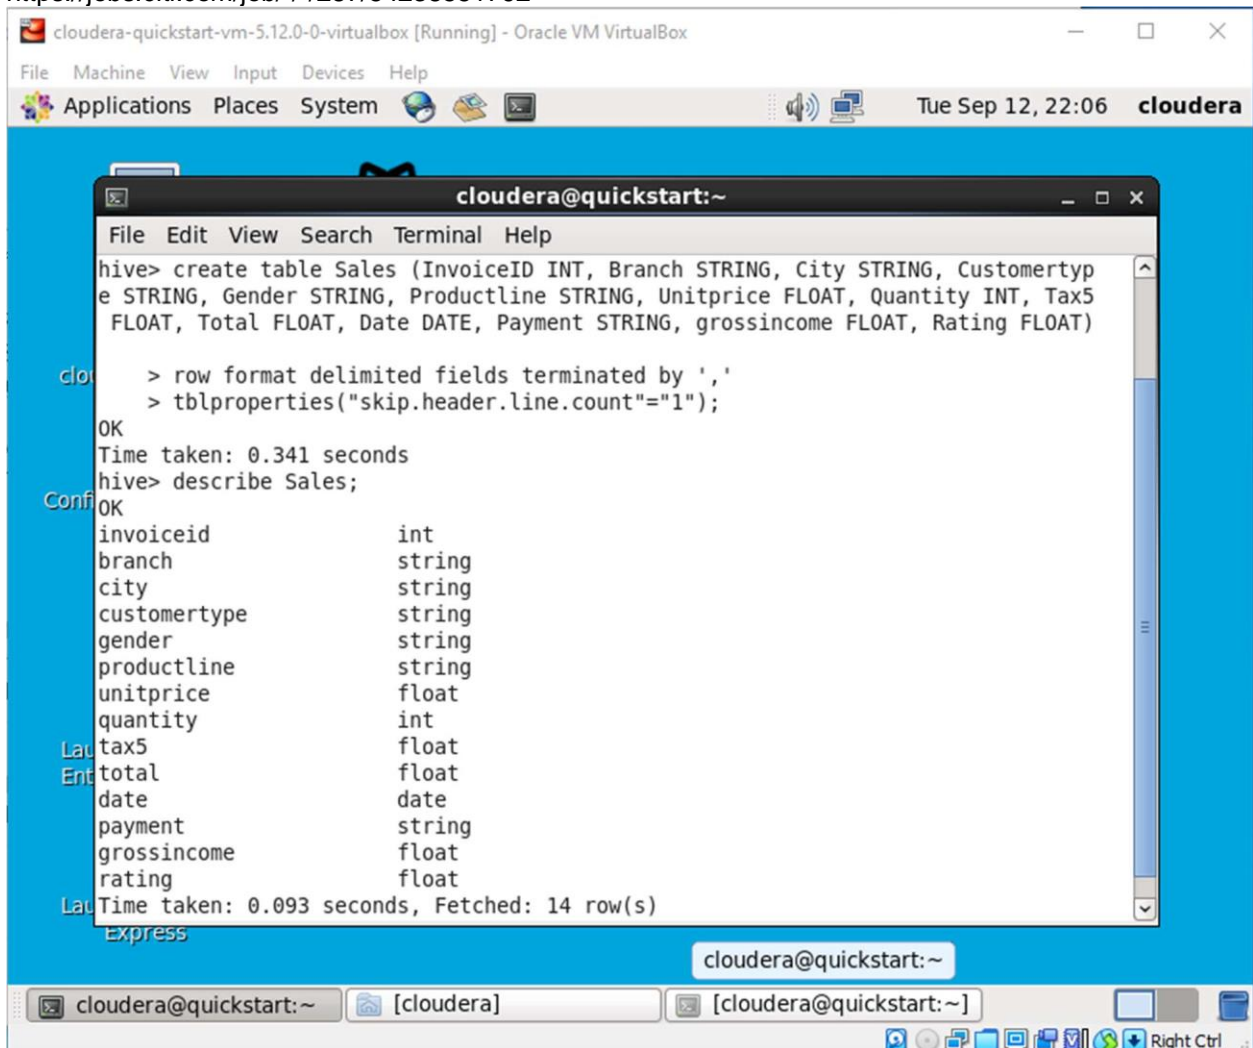

A terminal window titled 'cloudera@quickstart:~' with a menu bar (File, Edit, View, Search, Terminal, Help). The prompt is '[cloudera@quickstart ~]\$'. The user enters 'hive'. The output shows 'Logging initialized using configuration in file:/etc/hive/conf.dist/hive-log4j.properties', a 'WARNING: Hive CLI is deprecated and migration to Beeline is recommended.', and the command 'hive> show databases;' returning 'OK' and 'default'. The execution time is 'Time taken: 0.337 seconds, Fetched: 1 row(s)'. The prompt 'hive>' is followed by a cursor.

```

5

<https://jobs.citi.com/job/-/-/287/54238551792>

The screenshot shows a Cloudera Quickstart VM window with a terminal open. The terminal displays the following commands and output:

```
hive> create table Sales (InvoiceID INT, Branch STRING, City STRING, Customertype STRING, Gender STRING, Productline STRING, Unitprice FLOAT, Quantity INT, Tax5 FLOAT, Total FLOAT, Date DATE, Payment STRING, grossincome FLOAT, Rating FLOAT)

> row format delimited fields terminated by ','
> tblproperties("skip.header.line.count"="1");

OK
Time taken: 0.341 seconds
hive> describe Sales;

OK
invoiceid          int
branch             string
city              string
customertype       string
gender            string
productline        string
unitprice          float
quantity          int
tax5               float
total             float
date              date
payment            string
grossincome        float
rating            float

Time taken: 0.093 seconds, Fetched: 14 row(s)
```

The terminal window is titled "cloudera@quickstart:~" and has a menu bar with File, Edit, View, Search, Terminal, and Help. The background of the VM window is blue with the Cloudera logo. The bottom of the window shows a taskbar with icons for the terminal, a file explorer, and other applications.

6 & 7

```
cloudera@quickstart:~  
File Edit View Search Terminal Help  
hive> describe sales;

A terminal window titled 'cloudera@quickstart:~' with a menu bar (File, Edit, View, Search, Terminal, Help). The terminal displays the output of a Hive job. It starts with configuration commands for reducers, followed by job tracking information, a kill command, and progress updates for Stage-1. The job completes successfully with a total CPU time of 1.48 seconds and 18 successful HDFS writes. The final output is a single row with a sum of 55122.82658100128.
